# FLEET+ PRO

## Service Introduction

### INCREASE FIELD OPERATION EFFECTIVENESS

15%

### FUEL CONSUMPTION DOWN

7%

### NUMBER OF ACCIDENTS

13%

### REPAIR & MAINTENANCE COST

12%

### ECONOMIC TOTAL LOSS

32%

*Benefit examples are based on aggregated data from VEMOCO's participating customers.*

**VEMOCO Telematics** has been delivering cutting-edge telematics and field automation services since 2014, catering to businesses of all sizes, from small companies to large enterprises. Our AI-enabled, automated solution is accessible through:

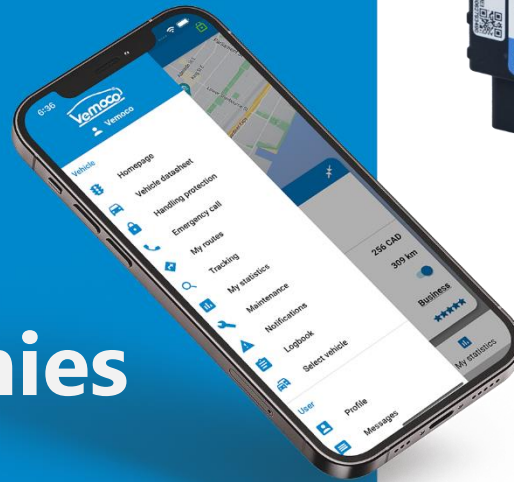

- **Web portal**
- **Mobile app (iOS, Android)**

Our technology captures data from vehicles, 3D acceleration sensors, GPS, and Bluetooth beacons, using the 4G-enabled VEMOCO device family, manufactured by Teltonika. This comprehensive platform supports over 20 use cases tailored for **large fleets, vehicle and equipment rental companies, insurers, dealerships, construction companies, and field service organizations.**

At VEMOCO, we prioritize solving customer challenges rather than just providing technology. Drawing from our extensive experience with large enterprises, we have primarily focused on use cases that drive cost savings and increase profitability. One of our key innovations is a proprietary advanced Driver Behavior Index, which scores drivers on metrics such as speeding, harsh turns, high engine speed, harsh braking, and rapid acceleration. This index, **widely adopted by global enterprises**, enhances driver safety, and reduces fuel costs.

Over the past decade, we have honed a solution that not only simplifies fleet management for drivers and operators but also empowers organizations with real-time alerts to swiftly detect and resolve operational issues. Our track record speaks for itself - VEMOCO has saved customers millions of dollars.

We are so confident in the value we provide that our services come with no upfront investment, no long-term contractual commitments, and deliver financial benefits to new customers within the first month - completely risk-free.

# Top Values for companies

## Precise Mileage Management

Access to detailed mileage data (including distance covered, idle times, and stopping) ensures companies have a clear view of fleet usage, leading to optimized route planning and reduced operational costs.

## Usage Reporting

IRS/CRA-compliant reporting support, including 100% accurate odometer readings, enables precise logbook management and seamless separation of private and business usage. This simplifies tax compliance and fleet management for businesses, saving time and ensuring regulatory adherence.

## Real-Time Vehicle Monitoring

Real-time vehicle tracking and geo-fencing provide enhanced security and operational control, enabling that vehicles stay within designated boundaries. This minimizes unauthorized usage and ensures efficient route adherence.

## Proactive Maintenance & Diagnostics

Immediate feedback on vehicle faults and automated maintenance reminders help minimize costly breakdowns and extend the life of vehicles. This proactive approach leads to lower maintenance costs and increased vehicle uptime.

## Fuel Cost Control & Efficiency

Smart fuel management and monthly fuel report uploads help detect fuel card misuse, reducing the risk of fraud and optimizing fuel consumption. This value translates into direct cost savings on fuel expenses.

### Enhanced Driver Performance

The proprietary advanced **VEMOCO Index** helps improve driving behavior by providing real-time feedback on speeding, rapid acceleration, and sharp turns. This results in safer driving, reduced fuel consumption, and lower vehicle wear and tear.

### Automatic Emergency Response (eCall)

VEMOCO's automatic accident alert (eCall) feature enhances driver safety by immediately initiating emergency calls in case of serious accidents, offering peace of mind for companies and their employees.

### AI-Driven Driver Detection

Sophisticated driver identification through the VEMOCO mobile app enables accurate tracking of who is driving the vehicle, which improves accountability reporting for fleet managers.

### Efficient Pool Car Management

VEMOCO's integrated pool car booking and handover process minimizes booking conflicts and enables better vehicle utilization, improving the efficiency of shared fleet management.

### Seamless System Integration

With flexible APIs, VEMOCO enables rapid integration with existing business systems, providing seamless data flow and enhancing operational efficiency within days.

### Theft Protection & Alerts

Real-time alerts notify drivers immediately if unauthorized vehicle movement is detected, providing enhanced vehicle security, and reducing the risk of theft.

### Increased Visit Effectiveness

Measuring visit effectiveness against corporate KPIs ensures that field service teams are optimizing their time and resources. This improves overall productivity and ensures higher ROI on field operations.

### Direct Communication with Drivers

The push messaging feature enables direct, customizable communication with drivers, enhancing engagement, delivering critical updates, and improving overall fleet coordination.

# Why is VEMOCO a better choice than its competitors?

- ✓ **No Commitment, No Upfront Costs:** No long-term contracts or initial investment. Free service termination anytime.
- ✓ **Immediate ROI:** VEMOCO delivers financial benefits within the first month, unlike competitors with slower returns.
- ✓ **Easy Setup and Support:** Free service setup and training ensure quick and efficient onboarding.
- ✓ **Automated Insights:** VEMOCO analyzes and alerts on anomalies, saving businesses time on manual data analysis.
- ✓ **Enhanced Driver Engagement:** Value-added services like real-time feedback and accident alerts improve safety and driver performance.
- ✓ Wide spectrum of built-in useful services at **no additional cost**.
